ARNAB PUSHILAL – 2020

TOPIC: Locating the best type of Fried chicken spot to open around Delhi

INTRODUCTION:

The inspiration behind this problem is pretty simple. I'm in love with fried chicken. So I kind of thought of a way to incorporate this final report in and around that.

The idea is to find a few fried chicken spots and around town and classify them with whatever parameters I can find.

BUSINESS PROBLEM:

Identifying critical parameters to open a new friend chicken spot in Delhi.

Data Used:

The Data is retrieved from Foursquare API for locations and names of the places. The other parameters like Price, Average rating from users are obtained from the ZOMATO API (a popular food delivery service in India)
